

✓ PDS PRACTICAL 4

- Name: Mehek Sawant
- Roll no: 34
- Batch: 02
- Date of Assignment: 05/08/26
- Date of Submission: 05/08/26

✓ NumPY

```
import numpy as np
```

a. Write a python code to create Numpy Array.

```
arr = np.array([10, 20, 30, 40, 50, 60, 70, 80])  
print(arr)
```

```
[10 20 30 40 50 60 70 80]
```

b. Write a python code to demonstrate basic operations on single array.

```
arr = np.array([10, 20, 30, 40, 50, 60, 70, 80])  
print("Addition= ", arr+5)  
print("Subtraction= ", arr-10)  
print("Multiplication= ", arr*2)  
print("Division= ", arr/10)
```

```
Addition= [15 25 35 45 55 65 75 85]  
Subtraction= [ 0 10 20 30 40 50 60 70]  
Multiplication= [ 20 40 60 80 100 120 140 160]  
Division= [1. 2. 3. 4. 5. 6. 7. 8.]
```

c. Write a python code to create array with 10 elements and slice element from 1st to 5th element.

```
arr = np.array([10, 20, 30, 40, 50, 60, 70, 80])  
print(arr[0:5])
```

```
[10 20 30 40 50]
```

d. Write a python code to sort an array alphabetically.

```
name=([ "Mehek", "Nidhi", "Muffy", "Kaushal", "Adhira" ])  
print(np.sort(name))
```

```
[ 'Adhira' 'Kaushal' 'Mehek' 'Muffy' 'Nidhi' ]
```

e. Write a python code to create a filter array that will return maximum values from an array.

```
sal=np.array([5000,2490,6793,89000,54679,20000])  
print(sal[sal>20000])
```

```
[89000 54679]
```
